DYNABOOK EXTENDS SATELLITE PRO C40 RANGE WITH AMD RYZEN™ PROCESSORS

- **New 14" device offers business users outstanding performance at an entry level price point, with the latest AMD processor technology and impressive 11.5 hours battery life**
- **Business tasks and collaboration are made easy with an impressive suite of productivity, connectivity, and security features**

12 May 2022, Neuss, Germany – Today, Dynabook Europe GmbH announces the expansion of its Satellite Pro C40 range to include AMD Ryzen™ 5 and 7 series processors with Radeon™ Graphics, broadening its range of budget-conscious business laptops. Carefully engineered with a variety of productivity, connectivity, and security-enhancing features in an attractive, slimline package, the Satellite Pro C40D-B offers an outstanding level of price and performance for all day working, wherever that may be.

Engineered for hybrid working

Weighing up to 1.52kg* and with an 18.9mm compact form factor, the Satellite Pro C40D-B is easy to carry and amongst the slimmest in its class, making it suitable for all types of modern working styles – in the office, at home or on the move.

The new device has been updated to offer the most important technology for everyday business use. Powerful AMD Ryzen™ 5 5600U and Ryzen™ 7 5800U processors, up to 32GB fast DDR4 memory in two configurable slots, and SSD storage options up to 512GB mean the device can easily perform even the most demanding tasks, ensuring business continuity anywhere. For an enhanced user experience and improved productivity, the C40D-B is also equipped with an extra-large ClickPad, and an impressive battery life of up to 11.5 hours[1], perfect for users working on the move.

Trusted for security

The C40D-B provides all the essential data and device protection tools to keep employee and business data safe, no matter where they're located. The device's firmware-based Trusted Platform Module (TPM) 2.0 means sensitive information is encrypted on the device to remove the risk of tampering. Combined with user and admin password capabilities which impede unsolicited access, as well as sign-in via an optional fingerprint scanner (SecurePad), the

device acts as the first line of defence against data breaches. In addition, an optional Kensington lock slot helps prevents physical theft.

Unbeatable connectivity

Enjoy hassle-free connectivity and collaboration via an array of connectivity options. A USB Type-C port provides charge, connect and display functions via one port, while a full-size HDMI, 2 x USB Type-A 3.1 and MicroSD card reader enable further display and accessory connectivity.

What's more, WiFi 802.11 AC and up to Bluetooth 5.0 provide fast connection and download speeds, while a Gigabit-LAN port offers rapid access to network resources back in the office. When it comes to staying in touch with customers and colleagues in different locations, the C40D-B is ready for action. An HD webcam, stereo speakers and in-built Cortana-enabled microphone provide rich sound and crisp visuals for great quality video calls. The device is also equipped with a mic/headphone slot, providing users the option to plug in or pair headphones.

Designed for style and comfort

With a sleek dark blue exterior, the C40D-B is professional and contemporary-looking. Featuring a slim bezel on its non-glare 14" LCD FHD or HD screen, the device offers users a crisp and clear visual experience, providing comfort throughout the working day. Beyond its attractive design, the device has been treated with an anti-bacterial coating to limit the growth of potentially harmful bacteria by up to 99.9%[2].

"The launch of the Satellite Pro C40D-B with AMD processor technology perfectly illustrates how we deliver the best possible choice and value to our customers", said Damian Jaume, President, Dynabook Europe GmbH. "By broadening the range of devices available, we are enabling all businesses to access reliable and versatile technology at an affordable price point."

The Satellite Pro C40D-B will be available from June 2022. For more information about the Dynabook range please visit: https://emea.dynabook.com/laptops/satellite-pro/
