

## **DYNABOOK EXTENDS SATELLITE PRO C50 SERIES**

- **Satellite Pro C50-G supports further range of processors including Intel® Celeron® CPUs**
- **Feature-rich 15" laptop developed with the value-orientated professional or student in mind**
  - **Meets an even wider range of user specifications and budgets**

**24<sup>th</sup> February 2021, Neuss, Germany** – Today, Dynabook Europe GmbH announces the Satellite Pro C50-G, an additional 15" model designed to combine performance, productivity and contemporary design features at an affordable price point. To offer additional choice within the Satellite Pro C50 series, the new C50-G broadens the selection of 10<sup>th</sup> Generation Intel® processors available, including Core™ and Celeron® CPUs.

### **Portable by design**

Careful curation means that the C50-G balances performance and functionality with design and mobility. A dark blue, sleek exterior gives the device a modern aesthetic that will appeal to the modern professional or student at home, in the office or on the move. Under the hood, the Intel® processors coupled with DDR4 memory up to 16GB\* and fast SSD storage options up to 512GB deliver high levels of performance. The laptop is easy to transport, with a 19.7mm form factor weighing just 1.8kg\*. A battery life of up to 13.5-hours<sup>1</sup> provides easily enough power for a full working day between charges. Its 15.6" anti-glare HD or FHD screen brings a big-screen experience while the large keyboard with numeric keypad and ClickPad provide comfort all day for improved user workflows. An optional SecurePad with fingerprint reader is also available. What's more, the C50-G goes beyond a contemporary-looking design, having been treated with an anti-bacterial coating to limit the growth of potentially harmful bacterial by up to 99.9%<sup>2</sup>.

"Having access to the essentials for a productive work or study day no longer needs to drain the budget. At Dynabook, we are committed to providing technology choices at a range of specifications and prices to suit any business need or budget," said Damian Jaume, President, Dynabook Europe GmbH. "The new C50-G model delivers a solid toolkit for everyday computing, all in a compact and attractive form factor, without the premium price tag."

### **Cutting-edge connectivity, in any location**

The C50-G benefits from an extensive range of connectivity capabilities so that users can stay connected and productive, wherever they may be. For wireless, the device is equipped with WiFi 802.11 AC and Bluetooth capabilities. Despite its thin form factor, when it comes to peripheral connectivity, the device features a multi-functional USB Type-C port for charge, display, connect and transfer all in one, in addition to two further USB 3.1 Type A ports, a full-size HDMI port and Gigabit-LAN port. Furthermore, a Micro SD card slot accommodates additional storage needs.

With the current circumstances necessitating remote business and study, the C50-G delivers all the tools for staying connected with colleagues, customers and peers. The device features an HD Webcam, stereo speakers and in-built Cortana-enabled microphone. A mic/headphone slot or Bluetooth gives users the option to plug in or pair headphones.

### **Security users can trust**

With data security a major concern for many businesses and education establishments today, the C50-G features firmware-based Trusted Platform Module (fTPM) 2.0 so information is encrypted on the device and reduces the risk of data tampering. In conjunction with user and admin password capabilities which inhibit unauthorised access, the device acts as the first line of defence against increasingly sophisticated cybercriminals. An optional Kensington lock slot gives users the peace of mind that the C50-G will be exactly where they have left it.

The Satellite Pro C50-G will be available from March 2021. For more information about the Dynabook range please visit: <http://emea.dynabook.com/>
