

## **DYNABOOK REFRESHES PORTÉGÉ X SERIES WITH LATEST Intel®**

### **CORE™ PROCESSORS AND PRIVACY FEATURES**

- **Collection of three lightweight, thin, high-performance laptops**
- **Updates to Portégé X30-G, Portégé X40-G and Portégé X50-G include 10th Gen Intel® Core™ Processors, optional vPro™ technology, Wi-Fi 6 and new security features**
- **Refreshed series also meets Microsoft's Secured-core PC requirements**

**13 May 2020, Neuss, Germany** – Dynabook Europe GmbH today announces the launch of the refreshed Portégé X Series, which includes the 13.3-inch Portégé X30-G, 14-inch Portégé X40-G and 15.6-inch Portégé X50-G<sup>1</sup>. Powered by Intel® 10th generation processors, the completed range of premium business laptops boasts the latest performance and security-enhancing features that are well suited for the modern, mobile professional.

#### **Secure and powerful**

Each device in the Portégé X Series has been carefully engineered with power and privacy front of mind. Optional configuration with newly launched vPro™ technology<sup>2</sup> is available for unrivalled productivity, manageability, and security. With growing recognition of webcam security, dynabook has expanded the availability of its webcam privacy shutter to the full series. For further privacy, the X40-G has been exclusively equipped with dynabook's new privacy display technology, which narrows the display's field of vision and keeps your screen secure from visual hacking, at the touch of a button on the keyboard.

The trio of new models have further in-built security features to meet Microsoft's Windows 10 Secured-core PC requirements including dynabook's proprietary BIOS, TPM 2.0 and optional smart card reader. In addition to this, biometric authentication in the form of an integrated IR camera for Windows Hello face authentication and a built-in SecurePad™ with integrated fingerprint reader gives users further peace of mind against unsolicited access to sensitive information.

In addition to the latest core processors, a selection of memory and storage capabilities such as SSD storage including ultra-fast PCIe and Intel® Optane, mean the refreshed devices enable smoother and faster workflows, even away from the office.

### **Mobile by design**

Despite being packed with a range of cutting-edge features, the Portégé X Series laptops don't compromise on portability or design. All three devices boast sleek, thin and ultra-light form factors – starting with the 13.3-inch Portégé X30-G, which weighs 1.05kg<sup>2</sup>, the 14-inch Portege X40-G at just 1.25kg<sup>2</sup> and finally the Portégé X50-G, which brings the user experience of 15.6-inch to the mobile worker weighing in at 1.42kg<sup>2</sup>. All of the laptops in the series are also built with a robust honeycomb-structured magnesium alloy chassis, that has undergone several MIL-standard tests. This, coupled with the devices' impressive battery life of between 14.5 and 18.5 hours<sup>3</sup> and additional charge using the Quick Charge function, means that workers don't need to worry about their device keeping up with the demands of modern-day mobile working.

### **Connectivity with ease**

All three laptops are armed with a range of connectivity-enhancing features for maximum productivity wherever a user is located. Wi-Fi 6® offers increased capacity and faster connection speeds, whilst two USB-C Thunderbolt 3-enabled ports provide more connectivity options. An optional Thunderbolt™ 3 Dock and dynamabook USB-C™ Dock solutions also provide further peripheral connectivity.

"We're proud to announce the refreshed Portégé X Series, having added the 14- and 15.6-inch models to the product family," said Damian Jaume, Managing Director, Dynamabook Europe GmbH. "We know how important investing in the right employee devices is for businesses, especially with remote and mobile working on the rise, so we wanted to develop a laptop series that effortlessly supports secure and productive working no matter where the user is, and this new trio of enterprise-grade devices does exactly that."

The Portégé X Series comes with dynamabook's unique [Reliability Guarantee\\*](#) – this means in the event of the device breaking within the one-year warranty, customers get a free repair and a full refund.

The series will be available from June 2020. For more information about the dynamabook range please visit: <http://emea.dynabook.com/>.

<sup>1</sup> The Portégé X40-G has been rebranded and refreshed from the Tecra X40-F, whilst the Portégé X50-G has been rebranded and refreshed from the Tecra X50-F
