

Dynabook launches new 13" device, the Satellite Pro C30-K, elegantly designed to stay connected

- **Smaller, thinner and lighter, new 13" model brings ultra-mobility to the Satellite Pro C-Series**
- **A device with a premium design and business performance, with the latest 12th Gen Intel® Core™ processor**
- **Lightweight and secure. A perfect device for the SMB and education markets**

13 September 2022, Neuss, Germany – Dynabook Europe GmbH today announces the arrival of the all-new ultra-mobile 13.3-inch Satellite Pro C30-K, combining performance and productivity with a contemporary modern design. Powered by the latest 12th Gen Intel® Core™ processors and with a focus on an affordable price point, the Satellite Pro C30-K is the perfect fit for the SMB and education markets.

"We're excited to introduce the first 13" device to our Satellite Pro C-Series, to continue delivering cutting-edge technology and design at a great price point," said Damian Jaume, President, Dynabook Europe GmbH. "The new C30-K proves that entry-level devices can be stylish, feature packed and great quality, without paying a premium price tag. With the new lightweight design, it offers excellent mobility for working on the move, providing an ideal option to help professionals and students stay secure, connected and productive no matter where they're working or studying."

Slim and stylish by design

The Satellite Pro C30-K has been built with an elegant, sleek and modern design, finished in an attractive dark blue colour, to appeal to today's professionals or students, whether in the office, at home, in the classroom or on the move. The new device boasts a slimline and lightweight build with a slender aluminium frame, measuring just 15.95mm high and weighs just 1.16kg, to maximise mobility. For peace of mind and safe usage, the chassis, keyboard and clickpad have been treated with an antibacterial coating to reduce the spread of potentially harmful bacteria by up to 99.9 per cent.¹

Powerful performance combined with cutting edge connectivity

Compatible with either Windows 10 or 11, the C30-K comes packed with enhanced performance and a variety of connectivity capabilities. The latest 12th Gen Intel® Core™ processors, coupled with DDR4 3200MHz memory up to 32GB and PCIe SSD storage options up to 1TB², combine to deliver effortless and efficient workflows whether in or away from the office or classroom. The device is also equipped with either LI-Po 3-45Wh or 4-cell 53Wh batteries to deliver nearly ten hours battery life,³ powering users through even the most demanding of working days.

The C30-K has been carefully engineered to include a range of ports and connectivity options which enable users to collaborate and stay productive – wherever they are. A multifunctional USB 3.2 Type-C port allows charge, display, connectivity and data transfer, along with a further two USB 3.2 Type-A ports. An HDMI port, an RJ45 connector and a Micro SD card slot provide further connectivity and storage options; and for wireless connectivity, the device is equipped with WiFi 6 802.11 AX.

The C30-K offers a seamless remote experience with premium audio-visual tools and conferencing buttons on the ergonomic keyboard to easily connect with colleagues, students and peers. An anti-glare HD or FHD screen provides an immersive full-screen experience with the display size optimised through a thin bezel design. The LCD can be opened to 180 degrees to easily share content with participants during a meeting and the HD webcam is accompanied by stereo speakers for crisp and clear videoconferencing. An external headphone/microphone slot provides the option to plug in when needed. Furthermore, inbuilt Realtek™ AI noise reduction removes unwanted background sounds for both the user and other meeting participants.

Advanced security SMBs and schools can rely on

With security being front of mind for many businesses and educational institutions, the new Satellite Pro C30-K features firmware-based Trusted Platform Module (fTPM) 2.0 so information is encrypted on the device, minimising the risk of data tampering from unwanted outside sources.

Robust biometric authentication is available in the form of an optional integrated face authentication camera. Furthermore, an optional biometric fingerprint reader provides users with additional security. A webcam privacy shutter enables further confidentiality, as well as a security lock slot.

The new Satellite Pro C30-K will be available later this month. For more information about the Dynabook range please visit: <https://emea.dynabook.com/laptops/satellite-pro/>
