

DYNABOOK UPDATES RANGE TO BRING 11TH GEN INTEL® CORE™ PROCESSORS TO KEY DEVICES

- **Satellite Pro L50-J and Tecra A30-J equipped with upgraded Intel processors and enhanced memory**
- **Further processors added to Satellite Pro C40 range**

11 January 2021, Neuss, Germany – Today, Dynabook Europe GmbH announces updates to three business devices targeted at the business and education market. The Tecra A30-J and Satellite Pro L50-J are updated with the latest 11th Gen Intel® Core™ processors and DDR4 memory, while the Satellite Pro C40-G now features additional 10th Gen Intel® Celeron® processors and DDR4 memory up to 16GB. The addition of Celeron® processors allows the C40-G to meet a broader range of specifications and price points, making it ideal for the budget-conscious professional or student.

Ready for life on the move

Each of the refreshed devices has been designed with portability, productivity and usability front of mind. Weighing just 1.2kg, with up to 14 hours¹ of battery life, the 13.3" A30-J can keep users productive throughout the working day wherever their location. The 15" L50-J boasts up to 10 hours¹ of use on one charge and weighs from just 1.7kg**, while the 14" C40-G provides up to 8 hours¹ of use at just 1.55kg. Narrow bezel designs around bright anti-glare screens make the devices ideal for even the most challenging lighting conditions, each boasting a range of screen types and brightness levels, too. All three devices are equipped with a large keyboard and ClickPad, with supporting Precision Touchpad for comfortable all-day typing and navigation.

The new models have been designed with the most demanding worker and student in mind. They all boast a robust chassis within distinguished, sleek exterior designs. The surface of the Satellite Pro C40-G has even been painted with a special anti-bacterial coating to protect users from the growth of bacteria. Tested² at a level of 99.9%, users can trust that these paint coated surfaces will not be a breeding ground for bacteria.

"Our goal is to use the latest and most appropriate technology to empower our wide spectrum of customers in their daily work – from students to professionals," said Damian Jaume, President, Dynabook Europe GmbH. "That's why we are broadening the range of products available with the latest 11th Gen Intel® Core™ processors, and at the same time harnessing Intel 10th Gen processor technology to provide even more affordable models in the C40-G range."

Stay connected, no matter where you are

Each device has been built with a range of ports and connectivity options so users maintain productivity irrespective of their location. A USB Type-C port gives charge, connect, display and transfer data functions to each device via a single port, while a full-size HDMI port and optional USB-C dock provide further peripheral connectivity. In addition, the devices include further USB3.1 ports – two on the C40-G and A30-J and three on the L50-J. A micro SD card

slot accommodates portable storage needs. When it comes to wireless, along with each device's Gigabit LAN port, the A30-J and L50-J are equipped with Wi-Fi 6 and the C40-G is equipped with WiFi 802.11 AC, enabling easy and quick connections to the Internet. By supporting fast 1TB PCIe SSD**, the Satellite Pro L50-J provides further flexibility in terms of performance and storage capacity.

The A30-J, L50-J and C40-G allow users to easily communicate and collaborate with customers, colleagues and peers, too. Each device is fitted with an 2MP FHD Webcam**, stereo speakers and an in-built Cortana-enabled microphone, with the option for users to pair their own headphones via Bluetooth or through the mic/headphone combo slot.

Secure at the core

Protecting company and employee data and assets is a multi-faceted challenge. That's why the A30-J, L50-J and C40-G are equipped with Trusted Platform Module (TPM) 2.0 along with user and admin password capabilities to prevent unauthorised access, as well as sign-in via a fingerprint scanner (SecurePad). Beyond this, a security lock slot helps prevent physical theft, while the A30-J and L50-J both feature an optional smartcard slot to match specific security requirements. A webcam shutter slider is also built in to the L50-J** for further privacy.

All new devices will be available from February 2021. For more information about the dynabook range please visit: <http://emea.dynabook.com/>
